DETAILED ACTION

Claims 20-25 are pending in this application.

Irradiation Process

The papers filed on July 17, 2002 (certificate of mailing dated July 10, 2002) have not been made part of the permanent records of the United States Patent and Trademark Office (Office) for this application (37 CFR 1.52(a)) because of damage from the United States Postal Service irradiation process. The above-identified papers, however, were not so damaged as to preclude the USPTO from making a legible copy of such papers. Therefore, the Office has made a copy of these papers, substituted them for the originals in the file, and stamped that copy:

COPY OF PAPERS ORIGINALLY FILED

If applicant wants to review the accuracy of the Office's copy of such papers, applicant may either inspect the application (37 CFR 1.14(d)) or may request a copy of the Office's records of such papers (*i.e.*, a copy of the copy made by the Office) from the Office if Public Records for the fee specified in 37 CFR 1.19(b)(4). Please do **not** call the Technology Center's Customer Service Center to inquiry about the completeness or accuracy of Office's copy of the above-identified papers, as the Technology Center's Customer Service Center will **not** be able to provide this service.

If applicant does not consider the Office's copy of such papers to be accurate, applicant must provide a copy of the above-identified papers (except for any U.S. or foreign patent documents submitted with the above-identified papers) with a statement that such copy is a complete and accurate copy of the originally submitted documents. If applicant provides such a copy of the above-identified papers and statement within **THREE MONTHS** of the mail date of this Office action, the Office will add the original mailroom date and use the copy provided by applicant as the permanent Office record of the above-identified papers in place of the copy made by the Office. Otherwise, the Office's copy will be used as the permanent Office record of the above-identified papers (*i.e.* the Office will use the copy of the above-identified papers made by the Office for examination and all other purposes). This three-month period is not extendable.

Action Summary

1. The rejection of claim 20 under 35 U.S.C. 103(a) over Roe in view of Wenninger et al. is being maintained for the reasons stated in the previous office action.

Response to Arguments

2. Applicant's arguments filed July 17, 2002 have been fully considered but they are not persuasive.

Applicants argue that the cited references provide no teaching or suggestion with respect to rub-off and wash-off resistant composition of the present invention. It is argued the Wenninger is a handbook of several thousand compounds to which one of ordinary skill in the art would not have been motivated to choose select those employed by applicant. It is the position of the examiner that the combination of Roe and Wenninger discloses the claimed invention. The claims are not drawn to rub-off and wash-off compositions they are drawn to a "disposable absorbent article having a film-forming composition disposed on at least a skin-contacting surface" therefore that argument is moot. Column 23, lines 28-44 of Roe as mentioned before describe optional components of which film formers are mentioned. It is also mentioned that all these materials as well known in the art as additives for such formulations. Therefore, it is obvious to add these optional components. The Wenninger et al. reference was cited merely to give a few examples of compounds that may be employed as film formers. Therefore, the claims are obvious over the cited prior art.

Drawings

3. The drawing(s) filed July 3, 2001 are approved by the Draftsperson under 37 CFR 1.184 or 1.152.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 21-25 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roe (US 5,609,587) in view of Wenninger et al. (*Int. Cos. Ingred. Dict. and Hand.* 1997).

Column 15, lines 49-64 of Roe describe that petroleum-based emollients can be employed in the composition. See previous office action for remaining rejection.

Conclusion

5. Claims 20-25 stand rejected.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1616

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
